

Calibration Master Assembly

- 
- A large, semi-transparent image of a Cal-Master assembly is positioned in the background on the right side of the page. It is a circular tool with a central hub and several spokes, appearing to be made of metal.
- Question:** Why is it so important to have my Micro-Poise Cal-Master and weights re-certified?
- Why:** You may be sending your customers bad product. A Calibration Master is a precision measuring tool that requires cleaning and inspection by a Micro-Poise Quality Engineer on a regular basis. Your Cal-Master can be out of tolerance due to wear during normal usage and by accidental damage. Only a certified Cal-master should be used to ensure Dyne 10 (accuracy) and Dyne 20 (repeatability) are performed properly.
- When:** Annually. Your Cal-Master and matching weights must be calibrated and certified once a year. Be sure to check the expiration date written on your official calibration certificate.
- What:** Verify offsets, radius, maintenance of flat face, roundness of bore, replacement of broken locator pins, repair of weights, and replacement of broken weight knobs.
- Interesting Fact:** **The buildup of dirt can cause your Cal-Master to be out of spec.** Your tooling needs to be cleaned before each use. Micro-Poise offers two styles of tooling cleaner: standard and a new "Green" version, please ask your customer service representative for details.
- Did you know?** Micro-Poise can manufacture new Cal-Masters for competitor's machines.
- How:** Contact your local Micro-Poise office or by email micropoise.csdsales@ametek.com for your Return Authorization Number (RMA) and have your Cal-Master and Weights sent back.
- We are here to help:** Micro-Poise now labels every Cal-Master with your recertification date for your convenience. If you are unable to locate your certificate Micro-Poise can advise you of the expiration date or send you a new copy for your quality records and planning schedule.

Part Numbers
CERTS-CALASSY
11-23910-1-CS
11-23910-2-CS

Description
CAL ASSY CERTIFICATION/TRACEABILITY
CASE-4 (1) GAL CANS CLEANER
TOOLING CLEANER NON –HAZ (CASE)

Globally Positioned to Serve **You**

Micro-Poise Measurement Systems LLC serves the tire and automotive industry all over the world.
